

PARK  AVENUE

GENERAL CATALOGUE

Park Avenue, a déjà-vu of shapes and colours immersed in the style of the 1920s in New York. These are echoes of Art Deco, reinterpreted in the present-day and enhanced by the skill of a company that has known how to preserve the values of tradition.

A wide range of products with no uniform stylistic features except for those aspiring to break away from the classical and Liberty virtuosities towards the more actual and functional forms typical of the 1920s and 1930s. A trend that becomes the soul and the common denominator of taste which permeates every Park Avenue mood.

Amidst classicism and modernity, Park Avenue expresses an international style far removed from time and fashion, which combines the excellence of Tuscan craftsmanship with the inspiration of the great era of the New York boroughs.

A story of crossroads and intersections, of temporal passages open to a spatial dimension without borders.

The minimalism of the forms frees the material from the restrictions of the past, enhancing a vibrant play of spaces and volumes to which the excellence of Tuscan craftsmanship endows uniqueness and exclusivity.

Park Avenue evokes the suggestion of an era capable of inventing fashions and trends, in which we witnessed the explosion of neighbourhood jazz at the same time as the proliferation of Art Deco. This is what inspired Park Avenue to bring into the present-day an artistic vision with a rich harmony of its elements.

A combination that creates a bond between the city of Florence and Tuscan tradition, a unique mix of culture and professionalism, passion for beauty and research for shapes and colours, with the charm and elegance of the architecture and design of the "roaring twenties".

PARK  AVENUE

COLLECTIONS

## MIRA

Its name derives from  
the Latin mirus, meaning  
"wonderful, marvelous,  
extraordinary."

An interplay of signs, materials, and oriental inspirations gives life to a surface with a bold yet sophisticated character. The new Mira décor reinterprets Japanese artistry through a contemporary graphic language: rigorous geometries and tactile textures alternate in perfect balance between tradition and design, expressing the most elegant soul of Park Avenue.

# CORA

Envision your decoration,  
you can achieve it.

Metal surfaces and glossy finishes: reflections of elegance. Geometric patterns expand on the walls, like a heady, and enveloping perfume, carrying us to another dimension. Shapes, materials and finishes combine to perfection in harmonious beauty, exalting the Park Avenue total look.

# CORA BOND

An architectural storyline, transporting us to the heights of the classic New York skyline, in a luxury penthouse. But here luxury is whispered, exclusive and as shimmering as a roaring 20's Hollywood star.

# CORA DIAMOND

Just like a jewel, this element defines the style of the entire bathroom environment through the decorations on the doors. That extra something to admire in its precious elegance.

# CORA INTRIGO

Something intriguing is a mystery, a charade, a riddle.  
The best part is not in the solution, but in the research.

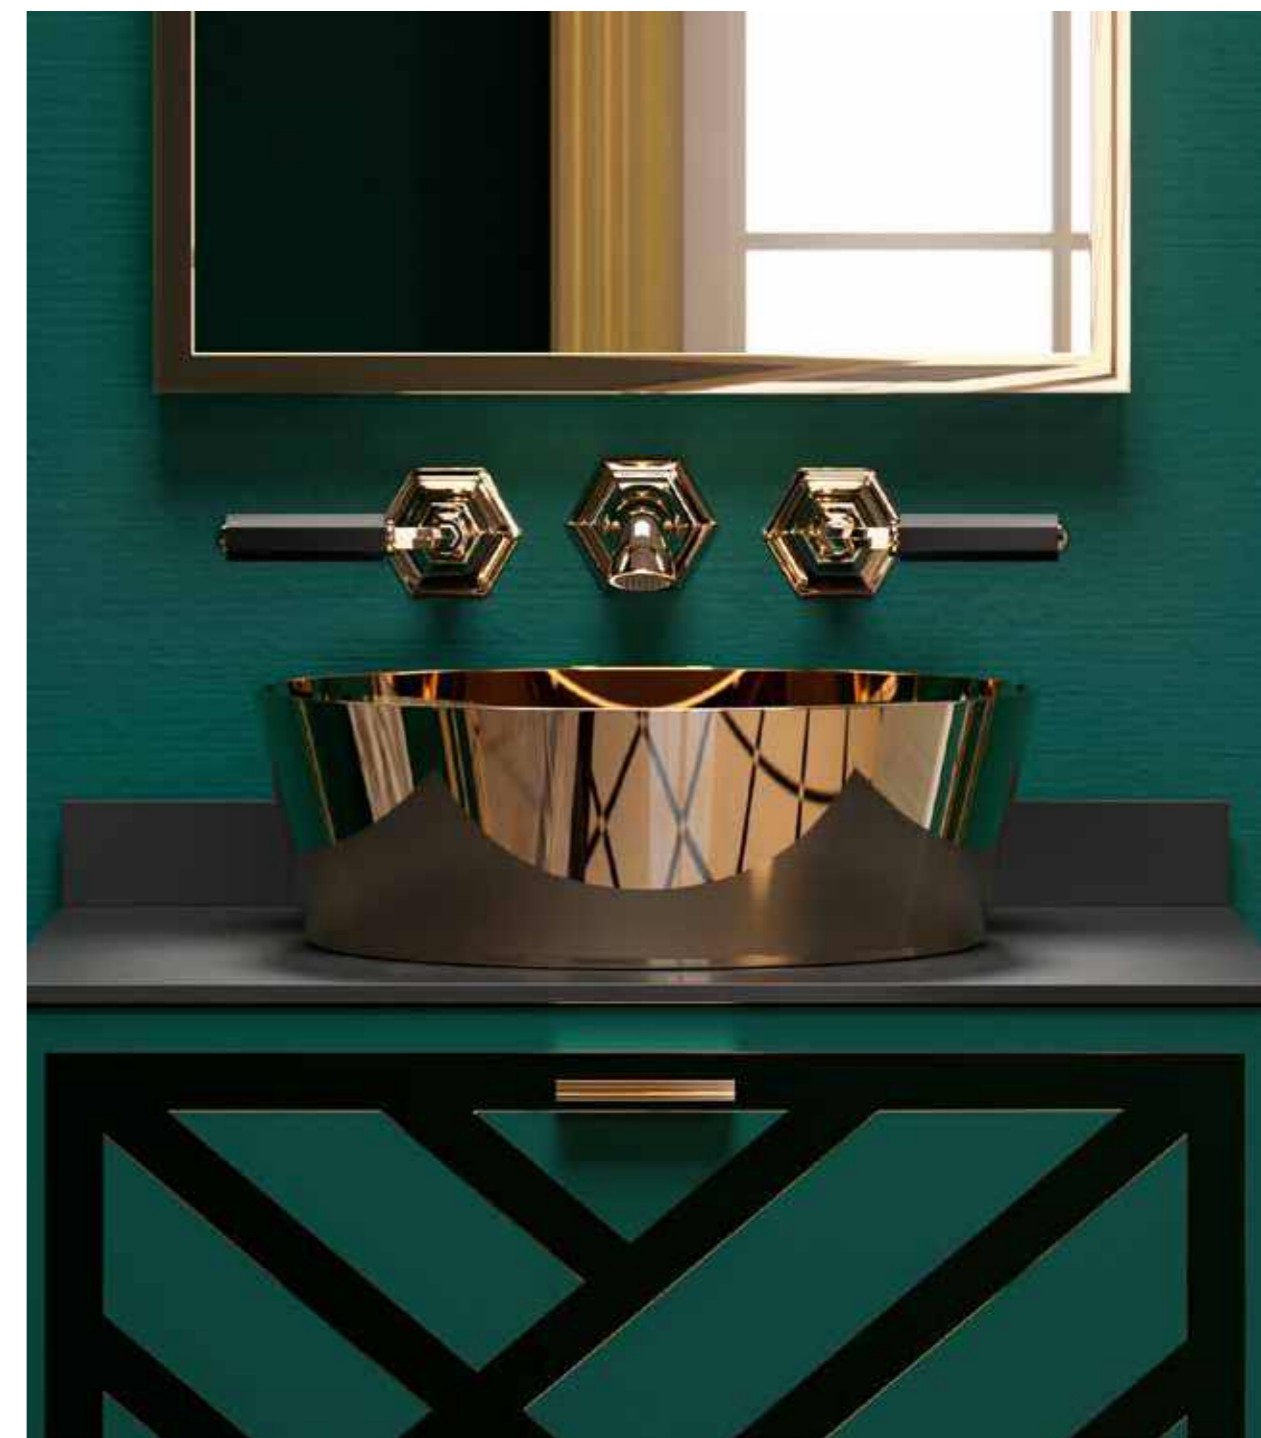

## CORA STRIP

Knowing how to read between the lines is an ability that allows those who pay attention to detail to acquire a new way of seeing things. A new perspective on shapes, colours and juxtapositions echoing the splendour of the Jazz Age.
